Editing AI-Generated Texts

💡 **Objective:** The goal of this task is to refine machine-generated texts to make them more 💃 **human-like** 🕺 in terms of style, coherence, and fluency.

❗ **Task:** You are provided with an instruction pair, comprising two components: (1) an instruction given to an AI assistant, such as ChatGPT, and (2) the assistant's response. Your objective is to refine the response, making it sound more human-like and ensuring it is free of errors.

🛠️ **How many edits should be done?** Attempt to edit 20%-40% of the provided text. Reject the text if it requires more significant improvements or does not follow the instructions completely. Aim for real-life settings: If a text is completely useless or requires a lot of refinement, most likely, the user would ask the AI assistant for a better response.

To
reject the text, hit the "💩 **too bad** 💩" button. If there is **nothing to edit** in the text, hit the "💎 **already perfect** 💎" button and proceed to the next text. No need to fill in the "Edit the AI Response" field in either of these two cases.

Guidelines

1. 📖 **Read:** Carefully read the provided texts, paying attention to the instruction and to how well the AI assistant followed it.

2. ✅ **Check:** Check that the prompt matches the category. See the fields **Category** and **Prompt** at the top part of the interface. If the prompt doesn't fall into the specified category, reject the text by hitting the "💩 **too bad** 💩" button.

3. 👓 **Assess:** Evaluate the assistant's response for coherence, grammar, style, and overall human-like quality. Identify any errors or areas that need improvement.

4. ✏️ **Edit:** Make necessary revisions to the assistant's response to enhance its human-like quality. This may include rephrasing sentences, correcting grammar mistakes, ensuring coherence, and adding a personal touch to it. See the list of the issues you may want to correct below.

   Follow the general response guidelines when editing texts for this task.

   In the task interface, you will see the task category (e.g., summarization, question answering). Make sure your answer fits the 🕐 Instructions for domain answer writing and guidelines for that specific category .

5. 💯 **Proofread:** Review the edited response to ensure it is free of errors and flows smoothly. Check for any remaining issues or inconsistencies.

6. 🔍 Run one of the recommended AI detectors on your edited responses to make sure the text is recognized as human.

   If you have a text that you've edited or humanized with changes of up to 40%, and you're struggling to modify it further while it's still being flagged as AI-generated by detectors, you can submit the text along with a comment indicating that it's still recognized as AI-generated.

7. ✔️ **Submit:** Once you are satisfied with the edits and the response meets the criteria of being human-like and error-free, submit your final version.

📝 Issues of AI-generated text that you may want to correct

🛠️ This list is not exhaustive. Follow your intuition and edit the text where you feel it's reasonable to do so.

▼ **Repetitions**. The same word, phrase, or sentence is repeated multiple times, either exactly or in slightly different ways.

Do: remove repeated words, phrases, and sentences.

▼ **Example**

👩🏾 **Instruction**: Where are The Dolomites located?

🤖 **AI assistant:** The Dolomites are located in the northern part of Italy. The Dolomites are situated in the northern region of Italy. In Italy, you can find the Dolomites in the north. The Dolomites, you see, they're located in Italy, but specifically in the northern part. Where are the Dolomites? Well, they're situated in Italy, in the northern part, to be exact. So, to answer your question, the Dolomites are located in Italy, more precisely, in the northern part of the country.

🖊️ **Edits**: The Dolomites are located in the northern part of Italy, within the Alps mountain range.

▼ **Awkward phrasing**. The text contains awkward or unnatural phrasing that makes it difficult to read or understand. It contains generic and simplistic language or, on the contrary, uses unnecessarily sophisticated, and outdated words and phrases.

Do: replace weird words and phrases with suitable synonyms. Clarify ambiguous language in the AI response.

▼ **Example**

👩🏾 **Instruction**: Where are The Dolomites located?

🤖 **AI assistant:** The enigmatic Dolomites, a geological marvel nestled amidst the illustrious Alpine expanse, are located in the northern part of Italy.

🖊️ **Edits**: The Dolomites are located in the northern part of Italy, within the Alps mountain range.

▼ **Tone and style.** The tone and style of the text do not align with the intended audience and purpose.

  ▼ **Example**

  👩🏿 **Instruction**: Write a message to my mom asking to share her apple pie recipe

  🤖 **AI assistant:** Hello Mother, I hope this message finds you well. Could you kindly share your wonderful apple pie recipe with me? I've been craving it lately and would love to try making it myself. Thank you very much in advance!

  ✏️ **Edits**: Hey Mom! 😊 Can you please share your awesome apple pie recipe with me? 🥧 I've been craving it lately and would love to give it a try myself! 🍏 Thanks a bunch!

▼ **Texts written from the AI assistant's point of view.** AI assistants tend to add some unnecessary sentences to the beginning or the end of the text. These AI's introductory sentences are unnecessary and should be omitted, according to our general instructions for Creative Writing - Reviews.

  Do: remove markers of a text generated by an AI assistant

  ▼ **Example**

  🤖 **AI assistant:** As an AI language model, I am not capable of having travel experiences, but here's an example review of a fun trip to Antarctica:

  Traveling to Antarctica was one of the most exciting and unforgettable trips I have ever taken...

  ✏️ **Edits**: Traveling to Antarctica was one of the most exciting and unforgettable trips I have ever taken...

▼ **Grammar errors.** The text is ungrammatical and contains strange disfluencies.

  Do: Edit so the text is grammatically correct, fix the sentence structure and correct the typos.

  ▼ **Example**

  👩🏿 **Instruction**: Write an Instagram caption for family Easter photos.

🤖 **AI assistant**: Sarah and her famil took a cte ester photo in the park yesturday. They enojoyd hunting for eggs an eating delious chocolat bunnys togeter.

✏️ **Edits**: Sarah and her family took a cute Easter photo in the park yesterday. They enjoyed hunting for eggs and eating delicious chocolate bunnies together.

▼ **Relevance**. The response doesn't fully follow the provided instruction and doesn't complete the target task.

Do: Remove any irrelevant or unnecessary information from the AI response. Add important details or context, if it is general domain knowledge and you do not need to google it.

▼ **Example**

👤 **Instruction**: When did John Lennon pass away?

🤖 **AI assistant:** John Lennon was shot on December 8, 1980, by Mark David Chapman outside of Lennon's residence, The Dakota, in New York City.

✏️ **Edits**: John Lennon passed away on December 8, 1980

❗ If the AI response is completely irrelevant to the instruction, reject the text by hitting the "I can't edit, the AI response is too bad" button.

▼ **Personal touch.** The text is too generic. You may want to add a personal touch to make the text more engaging.

▼ **Example**

👤 **Instruction**: Why is my daughter obsessed with the song driver's license?

🤖 **AI assistant:** The reasons for your daughter's obsession with "Driver's License" are likely multifaceted and may vary from person to person. It's important to approach her interest in the song with an open mind and

understanding, as music can be a significant form of expression and connection for many people.

🖊 **Edits**: Seems like your daughter's really into "Driver's License," huh? Maybe it's hitting close to home for her, you know? Why not ask her what's up with the song? Building trust by chatting about stuff like this can bring you closer and help you understand what's going on in her world.

▼ **Code fragments**. The text includes fragments that resemble programming language and are not contextually relevant. Note, that **markdown** labelling is okay and should stay.

Do: Look for code fragments in HTML, Python and other languages. Remove code fragments.

▼ **Example**

👩🏾 **Instruction**: Write an article about online banking

🤖 **AI assistant:**
<article>
<header>
Title: Embracing the Digital Age: The Evolution of Online Banking <p>
</header>

🖊 **Edits**:
Title: Embracing the Digital Age: The Evolution of Online Banking
▼ **Fact-check the AI response**

- **Factuality.** Check the facts provided by the AI assistant.

- **Sources.** If you can fix the facts based on common knowledge or your personal experience, you don't need to provide anything. If you searched online for the information to fix the facts, provide links to the found sources in the field "Sources" that you used to fact-check the AI response.

Do: Decide to what degree it is possible to edit the AI response to include correct facts.

- If the AI response needs complete rewriting, discard it by hitting the "💩 too bad 💩". Provide sources used to fact-check the AI response.

- If the fact can be corrected by modifying 20%-40% of the text, do so.

▼ **Example (reject)**

Instruction: What was the most popular arcade game in the United States in 1990?

🤖 **AI assistant:** One of the most popular arcade games in the United States in 1990 was "Street Fighter II: The World Warrior." This iconic fighting game was released by Capcom and quickly became a sensation in arcades worldwide, including the United States. With its diverse cast of characters, innovative gameplay mechanics, and competitive multiplayer mode, Street Fighter II captured the hearts of many gamers and is often regarded as one of the greatest video games of all time.

🖊 **Edits:** **reject** the text by hitting the "💩 **too bad** 💩"

▼ **Example (edit)**

Instruction: What was the most popular song in the United States in 2020?

🤖 **AI assistant:** As of 2020, several songs gained significant popularity in the United States, but one of the most notable hits was "Blinding Lights" by The Weeknd. This song topped the Billboard Hot 100 chart and remained there for **two** weeks. Its catchy melody, retro-inspired sound, and widespread appeal contributed to its success, making it one of the most iconic songs of the year. Additionally, "Blinding Lights" received critical acclaim and achieved commercial success in Japan, solidifying its status as a chart-topping hit in 2020.

🖊 **Edits:** As of 2020, several songs gained significant popularity in the United States, but one of the most notable hits was "Blinding Lights" by The Weeknd. This song topped the Billboard Hot 100 chart and remained there for **four non-consecutive weeks**. Its catchy melody, retro-inspired sound, and widespread appeal contributed to its success, making it one of the most iconic songs of the year. Additionally, "Blinding Lights" received critical acclaim and achieved commercial success **worldwide**, solidifying its status as a chart-topping hit in 2020.
